PRODUCT DESCRIPTION

The IP65 LED highbay lights replacing the traditional, high power halogen light sources are available in both SMD and COB chip versions. We recommend this solution for lighting large spaces with high ceilings, outdoor facilities, parking garages, shopping centers and halls. They are available in neutral white and cool white color temperatures, with a wide range of power versions to ensure the most precise light quantity for the spaces to be lit. Broader light scattering characterizes the SMD technology, while COB technology is characterized by more focused lighting.
