PRODUCT DESCRIPTION

The Avide LED integrated dust- and moisture-proof fixtures represent the modern versions of traditional fittings. The fixtures of different lengths replacing the tube fixtures have a built-in LED panel that guarantees energy-saving operation. In terms of the material used, the products have a break-resistant cover. Due to the IP65 protection of the fixture, it is protected from dust and moisture, thus can also be operated at places with higher exposure to dust and humidity.

The product range includes 3 different lengths and brightness levels, available in neutral white color temperature and with an opaline cover. The 60cm fixture has 20W power, while the 120 centimeter version has a 40W and the 150 centimeter type a 60W power output respectively.
